Assignment – 08

Patient Appointment Booking Form (Advanced) — Advanced Fields UseCase

1. Objective

To extend the existing "Patient Appointment Booking Form" application in Zoho Creator by incorporating all seventeen Advanced Fields available in the Form Builder, so that the form moves beyond basic data capture and demonstrates automation, computed values, file/media handling, and structured lookups within a real healthcare front-desk use case.

2. Problem Statement

The basic Appointment Booking Form (built earlier using the thirteen Basic Fields) captures a patient's identity, contact details, and department preference, but it cannot handle several real world requirements of a multi-specialty clinic: verifying doctor availability against the master duty roster, registering accompanying family members for a single visit, computing the net payable consultation fee after insurance coverage, issuing a unique scannable appointment reference, or accepting supporting media such as previous medical reports, a symptom video, or a signed treatment consent.

Extend the Appointment_Booking_Form in Zoho Creator so that, in addition to the existing basic fields, it uses every Advanced Field type provided by Zoho Creator's Form Builder to support family registration, fee computation, doctor availability verification, and automated appointment-ID/QR generation for check-in at the clinic.

3. Scope of the Use Case

- Application Name: Patient Appointment & Scheduling Management (Advanced Edition)
- Form Name: Appointment_Booking_Form (extended with Advanced Fields)
- Primary Users: Patients / Front-desk (Reception) staff and Doctors
- Report View: Appointment_Booking_Report (extended with computed payable fee, appointment ID, and QR code columns)
- Objective of the Extension: Enable the front desk to verify doctor availability automatically, register accompanying family members, compute net payable fees, and issue scannable digital appointment references

4. Advanced Fields Used and Their Mapping

The table below maps every Advanced Field from the Zoho Creator Form Builder palette to its role in the extended Patient Appointment Booking Form.

Advanced Field	Form Field Name	Purpose	Sample Value / Behaviour
Decision Box	Requires_Ambulance_Pickup	Captures a quick Yes/No decision on whether the patient requires an ambulance pickup for the visit	Yes / No toggle

Advanced Field	Form Field Name	Purpose	Sample Value / Behaviour
Rich Text	Clinic_Guidelines_Display	Displays formatted clinic guidelines (bold headings, bullet points, hyperlinks) directly within the form	"Please arrive 15 minutes early. Carry all previous prescriptions. Masks are recommended in the waiting area."
URL	Previous_Report_Portal_URL	Captures a link to the patient's previous lab report or health portal record, if available online	https://healthportal.example.com/reports /patient/7734
Image	Patient_Photo	Captures a photo of the patient for the clinic's identification record	patient_photo.jpg
Percent	Insurance_Coverage_Percent	Captures the percentage of the consultation fee covered under the patient's health insurance	80%
Currency	Consultation_Fee	Captures the standard consultation fee for the selected department, formatted with currency symbol	₹600.00
Decimal	Body_Temperature_F	Captures the patient's body temperature recorded at the time of check-in, in Fahrenheit	99.4

Date-Time	Appointment_Submitted_On	Automatically records the exact date and time the appointment request was submitted	24-Jul-2026 08:55
SubForm	Accompanying_Family_Members	Captures repeating rows of accompanying family member name, relation, and age for the same visit	Row 1: Kavitha Krishnan – Mother – 61; Row 2: Arun Krishnan – Father – 64

Advanced Field	Form Field Name	Purpose	Sample Value / Behaviour
Lookup	Doctor_Availability_Lookup	Looks up and auto fills the doctor's specialization and available time slots from a master Doctors table	Dr. Anand Rajan – Cardiology – Available 10 AM–1 PM
Signature	Patient_Digital_Signature	Captures the patient's digital signature consenting to examination and treatment	Signed (drawn signature captured)
File Upload	Previous_Medical_Report_Uploa	upload scanned copies of previous lab reports or prescriptions	lab_report_jun2026.pdf
Audio	Symptom_Voice_Note	Allows the patient to optionally record a short voice note describing their symptoms in their own words	voice_note_06.mp3 (0:20)

Video	Symptom_Video	Allows the patient to upload a short video showing a visible symptom, such as a skin condition or difficulty in movement	symptom_video.mp4 (0:25)
Auto Number	Appointment_ID	Automatically generates a unique, sequential appointment reference number for every booking	CLN-APT-2026-000815
Formula	Net_Payable_Fee	Automatically computes the net consultation fee payable after applying the insurance coverage	= Consultation_Fee − (Consultation_Fee × Insurance_Coverage_ Percent)

Advanced Field	Form Field Name	Purpose	Sample Value / Behaviour
QR/Barcode	Appointment_QR_Code	Automatically generates a scannable QR code encoding the Appointment ID for quick check-in at the reception	QR image encoding CLN-APT-2026-000815

5. Extended Form Layout (Section-wise)

The sections below are added to the existing Patient, Contact, and Medical Details sections of the basic Patient Appointment Booking Form.

Section E — Doctor Verification & Vitals

- Doctor Availability Lookup (Lookup field, auto-fills from master Doctors table)
- Patient Photo (Image field)
- Previous Medical Report Upload (File Upload field)
- Body Temperature (Decimal field)

Section F — Family Registration & Media Details

- Accompanying Family Members (SubForm field, repeating rows)
- Previous Report Portal URL (URL field)

- Symptom Video (Video field, optional)
- Symptom Voice Note (Audio field, optional)

Section G — Fee & Transport Preference

- Requires Ambulance Pickup (Decision Box)
- Consultation Fee (Currency field)
- Insurance Coverage Percent (Percent field)
- Net Payable Fee (Formula field, read-only, auto-computed)

Section H — Consent & System-Generated Values

- Clinic Guidelines Display (Rich Text field, read-only reference block)
- Patient Digital Signature (Signature field)
- Appointment Submitted On (Date-Time field, auto-captured)
- Appointment ID (Auto Number field, system-generated)
- Appointment QR Code (QR/Barcode field, system-generated from Appointment ID)

6. Validation & Configuration Rules

- Lookup field (Doctor Availability Lookup): connected to a master Doctors form; front-desk staff type-ahead search and select rather than typing free text.
- SubForm (Accompanying Family Members): configured to allow a minimum of 0 and a maximum of 4 rows per appointment.
- File Upload (Previous Medical Report Upload): restrict accepted formats to PDF, JPG, and PNG, with a maximum size of 5 MB.
- Image (Patient Photo): restrict accepted formats to JPG and PNG only, with a maximum size of 2 MB.
- Video (Symptom Video): restrict maximum duration to 30 seconds and maximum size of 50 MB.
- Percent (Insurance Coverage Percent): restrict value range from 0 to 100. • Currency (Consultation Fee): restrict to non-negative values only, formatted in INR (₹). • Formula (Net Payable Fee): set as a read-only field, recalculated automatically whenever Consultation Fee or Insurance Coverage Percent changes.
- Auto Number (Appointment ID): configured with prefix "CLN-APT-", the current year, and a 6-digit auto-incrementing sequence.
- QR/Barcode (Appointment QR Code): configured to auto-generate immediately after the Appointment ID is assigned on submission.
- Signature (Patient Digital Signature) and Decision Box (Requires Ambulance Pickup) are mandatory fields; the form cannot be submitted without them.

7. Workflow Summary

- Step 1: Patient completes the existing basic-field sections (personal, contact, and medical details).
- Step 2: Front desk verifies the Doctor Availability using the Lookup field, which auto-fills the doctor's specialization and open time slots.
- Step 3: If family members are accompanying the patient for the same visit, their details are added as rows in the Accompanying Family Members SubForm.
- Step 4: Patient uploads previous medical reports and optionally a symptom video and a voice note describing their condition.
- Step 5: Patient indicates whether an ambulance pickup is required, and the Consultation Fee, Insurance Coverage, and computed Net Payable Fee are displayed.
- Step 6: Patient reviews the Clinic Guidelines rich text block and provides their Digital Signature to consent to examination and treatment.
- Step 7: On Submit, Zoho Creator auto-generates the Appointment ID, timestamps the

Appointment Submitted On field, and generates the Appointment QR Code. • Step 8: The front desk reviews the Appointment_Booking_Report, verifies uploaded reports, confirms the payable amount against Net Payable Fee, and scans the QR code for a fast check-in at the reception.

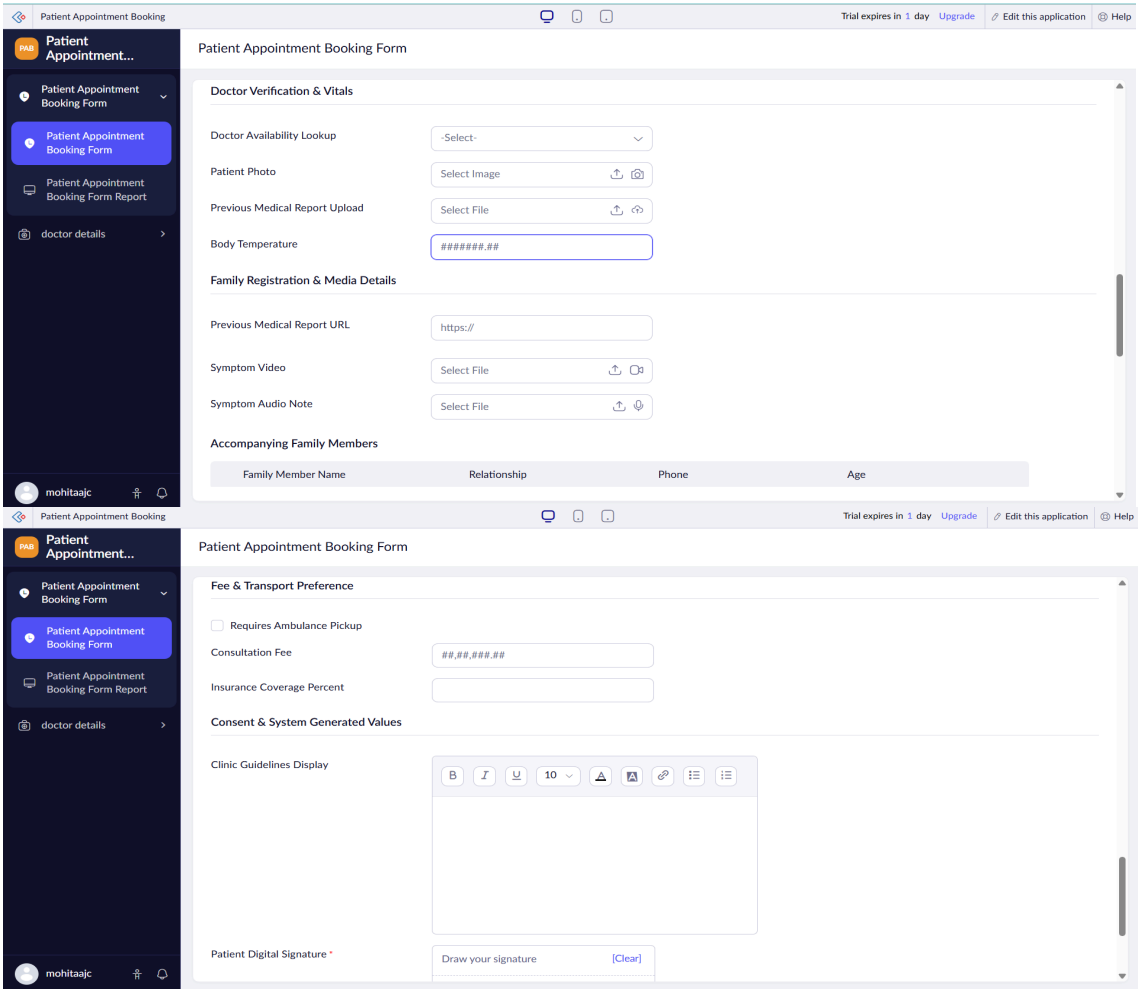

8. Expected Learning Outcomes

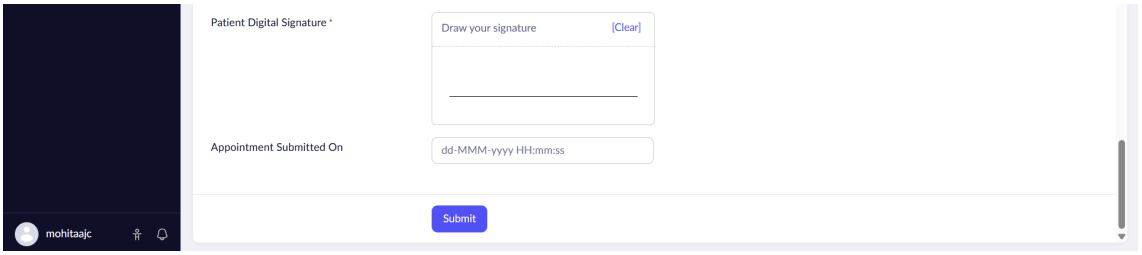

• Understand the purpose and correct use case for each Advanced Field in Zoho Creator.
• Learn how to configure Lookup fields for cross-form data verification.
• Practice using SubForms to capture repeating, family-based data within a single submission. • Understand how Formula and Auto Number fields automate calculations and unique identifiers.
• Learn how to configure file-based fields (Image, File Upload, Audio, Video, Signature) with format and size restrictions.
• Understand how QR/Barcode fields can be used for real-world check-in validation and process automation.

9. Deliverable for This Lab Exercise

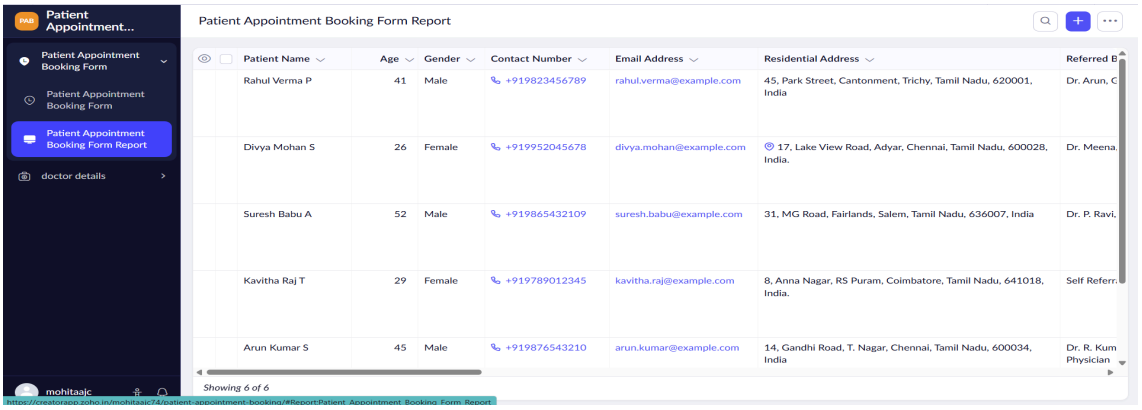

Students must extend their existing Appointment_Booking_Form in Zoho Creator to include all 17 Advanced Fields exactly as specified above, configure the listed validations and computed logic, and submit a screenshot-based lab record showing: (a) the extended form in Form Builder with all Advanced Fields, (b) a live preview of the form including the SubForm and computed Net Payable Fee, (c) at least two sample submitted records showing the auto-generated Appointment ID and QR Code in the report view, and (d) a screenshot of the Doctor Availability Lookup in action
