Assignment – 08

Patient Appointment Booking Form — Basic Fields Use Case

1. Objective

To design and build a functional "Patient Appointment Booking Form" application in Zoho Creator that demonstrates the correct usage of all thirteen Basic Fields available in the Form Builder, while solving a real healthcare front-desk requirement of scheduling patient appointments in a structured manner.

2. Problem Statement

- The front desk of a multi-specialty clinic receives appointment requests through phone calls and walk-ins, leading to double-bookings, missed follow-ups, and no structured record of a patient's symptoms or medical history before the consultation. Doctors often have no visibility into a patient's condition until the patient arrives.
- Design a low-code application using Zoho Creator that allows a patient to submit an appointment request through a single online form. The form must capture personal identity, contact details, department preference, symptoms, existing conditions, preferred schedule, and consent for treatment — using every Basic Field type provided by Zoho Creator's Form Builder.

3. Scope of the Use Case

• Application Name: Patient Appointment & Scheduling Management
• Form Name: Appointment_Booking_Form
• Primary Users: Patients / Front-desk (Reception) staff
• Report View: Appointment_Booking_Report (list of all submitted appointment requests)
• Objective of the Report: Enable the front desk and doctors to filter, confirm, and schedule patient appointments

4. Basic Fields Used and Their Mapping

The table below maps every Basic Field from the Zoho Creator Form Builder palette to its role in the Patient Appointment Booking Form.

Basic Field	Form Field Name	Purpose	Sample Value
Name	Patient_Name	Captures the full name of the patient using First/Last name sub fields	Meera Krishnan
Email	Email_Address	Captures a validated email address for sending appointment confirmation	meera.krishnan@example. com

Address	Residential_Address	Captures the patient's full residential address with city, state, and pincode	22, Nehru Street, Madurai, TN, 625001

Basic Field	Form Field Name	Purpose	Sample Value
Phone	Contact_Number	Captures a validated mobile number for the clinic to call and confirm the appointment	+91 98400 11223
Single Line	Referred_By	Captures a short free text entry for a referring doctor or source of referral	Dr. S. Balaji, General Physician
Multi Line	Symptoms_Description	Captures free-text description of the patient's current symptoms or reason for visit	Persistent headache and mild fever for the past 3 days.
Number	Age	Captures a numeric value with validation for the patient's age	34
Date	Preferred_Appointment_Date	preferred date of consultation using a date picker	05-Aug-2026
Time	Preferred_Appointment_T	preferred time slot for the consultation	10:30 AM
Drop Down	Department	Presents a single-select list of hospital departments/specializat ions	General Medicine
Radio	Gender	Captures a single mandatory selection among mutually	Female

		exclusive options	
Multi Select	Existing_Conditions	Allows selection of one or more pre-existing medical conditions or allergies	Diabetes, Allergy to Penicillin
Checkbox	Consent_For_Treatment	Captures the patient's consent to proceed with examination and treatment	Checked (Agreed)

5. Form Layout (Section-wise)

Section A — Patient Details

- Patient Name (First Name, Last Name)
- Age (Number field)
- Gender (Radio: Male / Female / Other)

Section B — Contact Details

- Email Address (Email field)
- Contact Number (Phone field)
- Residential Address (Address field)

Section C — Medical Details

- Referred By (Single Line)
- Department (Drop Down)
- Existing Conditions (Multi Select)
- Symptoms Description (Multi Line)

Section D — Scheduling & Consent

- Preferred Appointment Date (Date field)
- Preferred Appointment Time (Time field)
- I consent to examination and treatment (Checkbox)

6. Validation Rules to Configure

- Patient Name, Phone, Age, Gender, Department, Preferred Appointment Date, and Consent Checkbox are mandatory fields.
- Email field: built-in email format validation enabled.
- Phone field: country code format enabled for Indian numbers.
- Number field (Age): restrict value range from 0 to 120.
- Date field: restrict Preferred Appointment Date to disallow past dates.
- Checkbox (Consent): form cannot be submitted unless checked.

7. Workflow Summary

- Step 1: Patient opens the public form link shared on the clinic website or WhatsApp.
- Step 2: Patient fills in personal, contact, medical, and scheduling details across the four sections.
- Step 3: On clicking Submit, Zoho Creator validates all mandatory fields and formats.
- Step 4: A new record is created in the Appointment_Booking_Report.
- Step 5: An automated confirmation email (using the Email field value) is triggered to the patient.
- Step 6: The front desk reviews the report, filters by Department and Preferred Appointment Date, and confirms the final slot with the concerned doctor.

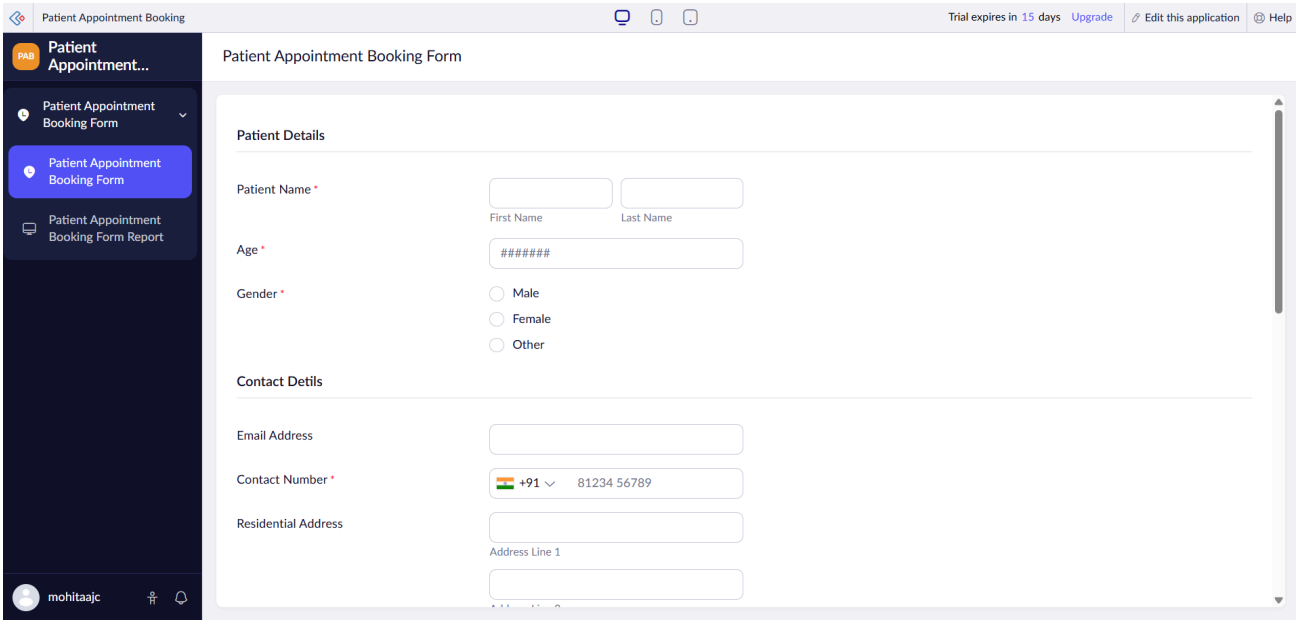

8. Expected Learning Outcomes

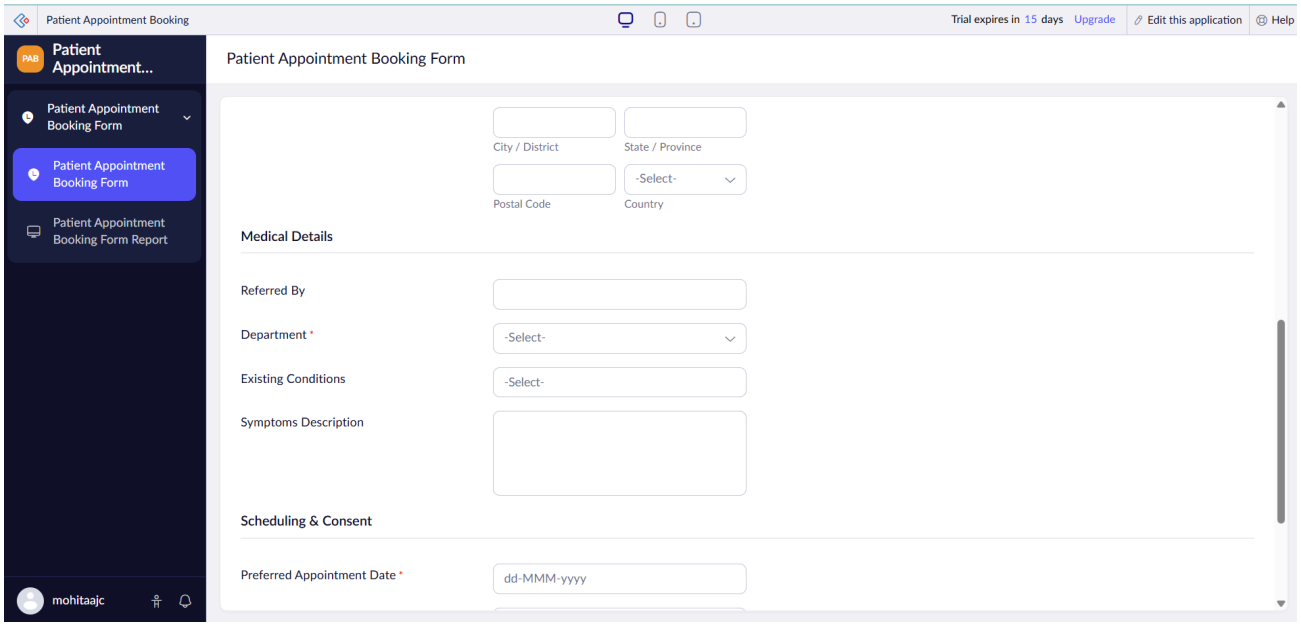

• Understand the purpose and correct use case for each Basic Field in Zoho Creator.
• Learn how to structure a healthcare form into logical, patient-friendly sections.
• Practice configuring field-level validations (mandatory, format, and range checks).
• Understand how form field values feed into report views and appointment scheduling workflows.

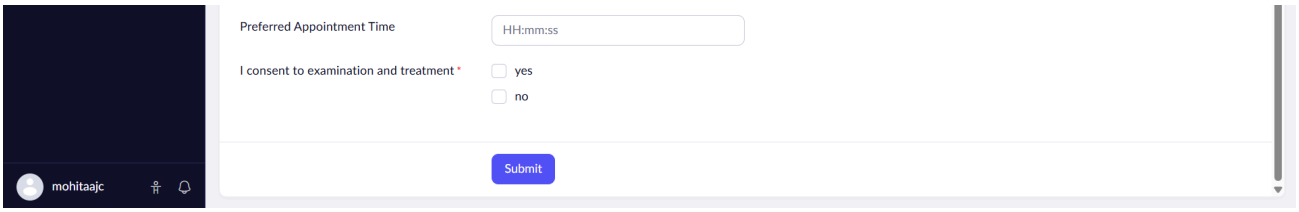

9. Deliverable for This Lab Exercise

Students must build the Appointment_Booking_Form in Zoho Creator exactly as specified above, apply the listed validations, generate the Appointment_Booking_Report, and submit a screenshot-based lab record showing: (a) the form in Form Builder with all 13 fields, (b) a live preview of the form, and (c) at least three sample submitted records in the report view.
